

# Earn 5 ASHI CEs When You Add Building Science Principles (BSP) to Your Toolbox

Prove you know the fundamentals of house-as-a-system building science by earning the Building Performance Institute's (BPI's) [Building Science Principles \(BSP\) Certificate of Knowledge](#).

Building science demonstrates how various components of the home interact to affect the home's overall performance. Understand the relationship between the building envelope, insulation, heating, A/C, mechanical ventilation, lighting, appliances and other systems of the home. Learn how all of these systems affect the comfort, health and safety of occupants and durability of the home. Discover why improving the energy efficiency of the home is the first step toward solar and other renewable energy improvements.

Prepare for the BSP online exam by first studying the companion Reference Guide that walks you through the major systems of the home. Then verify your knowledge by taking the 100 question online exam.

Go to [www.bpi.org/certificate](http://www.bpi.org/certificate) for more information on the BSP certificate.

**ASHI members and associates are eligible for a 25% discount off of the BSP certificate exam and companion reference guide.**
